ACKNOWLEDGMENTS

Although the Estimates and Statistical Analysis Section is responsible for the semiannual publication of the Population Projections, others in the Department of Corrections made significant contributions that are greatly appreciated. Among those involved in the projections were (in alphabetical order) the:

- Board of Prison Terms
- Information Systems Division
- Institutions Division
- Office of Budget Management
- Parole and Community Services Division

I. INTRODUCTION

INTRODUCTION

This document contains the California Department of Corrections (CDC) projections of institution, parole and outpatient populations for Fiscal Years (FY) 2001-02 through 2006-07. The projections are based upon the most current available data and existing law.

The projections incorporate the expected impact of Proposition 36, the Substance Abuse and Crime Act of 2000, which was passed on November 7, 2000, and became effective July 1, 2001 (See Section II.D.1).

A. Factors Affecting Population

- The CDC institution population on June 30, 2001, was 161,497, which was 300 less than expected. The population decreased by 32 over the Calendar Year (CY) 2000, compared to previous increases of 1,124 (CY 1999) and 4,287 (CY 1998). Since December 31, 2000, the institution population has increased by 842.
- During the years 1980-1989, the institution population experienced an annual compounded growth of 14.5 percent. This compares to a growth of only 6.3 percent during 1990-1999. The slower prison growth is due to a decrease or slowing of intake from court, somewhat offset by an increase in time served.
- Since January 1, 2000, population growth has continued to slow. The decade to date annual growth is currently only 0.03 percent.

B. Comparison of Fall 2001 with Spring 2001 Projections

1. Institution Population

In the Spring 2001 forecast, the total institution population was expected to be 161,797 by June 30, 2001, 300 higher than the actual population. This difference is due primarily to fewer new court admissions and more releases to parole than expected.

Table A Comparison of Fall 2001 with Spring 2001 Projections Institution Population¹ June 30, 2001 through June 30, 2007

Year End <u>June 30</u>	Fall 2001 Projections	Spring 2001 <u>Projections</u>	Difference
2001	161,497 *	161,797	-300
2002	156,409	157,660	-1,251
2003	155,721	158,787	-3,066
2004	156,337	161,211	-4,874
2005	158,429	164,333	-5,904
2006	161,159	168,010	-6,851
2007	164,623		

The Fall 2001 Projection for the institution population is lower than forecast in the Spring 2001Projection throughout the projection period. This is the result of a decrease in new admissions from court, returns from parole and the expected impact of Proposition 36. The prison population is expected to be 156,409 by June 30, 2002, 1,251 lower than the Spring Projection.

We are forecasting the population on June 30, 2003 to be 155,721, which is 3,066 lower than the Spring 2001 Projection. This decrease is primarily attributable to an expected decrease in new admissions. This decrease is expected to continue through June 2007. By June 30, 2007 the population is expected to be 164,623.

The expected decrease in institution population due to the impact of Proposition 36 for the budget year (FY 2002/03) is 5,984. For FY 2006/07 the decrease is 7,719.

¹ The population of the institutions consists of felons, civil narcotic addicts, county diagnostic cases, Youth Authority wards, persons from other states, federal prisoners, and county prisoners held for safekeeping. Felons include individuals under supervision in community-based facilities (in contract and non-contract beds) and State hospitals, as well as those actually in prison.

2. Parole Population

In the Spring 2001 Projections, the parole population was expected to be 122,249 on June 30, 2001, which is 2,613 higher than the actual population for that date. This difference is due mainly to the continuing trend of decreased new admissions, increased discharges and more PV/RTCs than expected.

Table B

Comparison of Fall 2001 with Spring 2001 Projections
Parole and Outpatient Population
June 30, 2001 through June 30, 2007

Year End	Fall 2001	Spring 2001	
<u>June 30</u>	<u>Projections</u>	<u>Projections</u>	<u>Difference</u>
2001	119,636 *	121,249	-2,613
2002	120,523	126,149	-5,626
2003	116,811	123,754	-6,943
2004	112,301	120,170	-7,869
2005	108,667	118,554	-9,887
2006	106,882	115,763	-8,881
2007	104,999		

By June 30, 2002, the number of parolees and outpatients supervised in California is projected to be 120,523, a decrease of 5,626 from the previous projection. By June 30, 2003, the parole population is expected to be 116,811, which is 6,943 lower than projected in Spring 2001. This decrease is primarily due to an increase in direct discharges from parole. A steady decline in the parole population is then expected through June 30, 2007, at which time the parole population is expected to be 104,999.

3. Other Populations

The civil addict institution population was 2,071 on June 30, 2001, which is 157 lower than projected in Spring 2001. It is now estimated that the civil addict population will be 1,882 on June 30, 2002, which is 127 lower than the Spring Projections. By June 30, 2007, the population is expected to be 1,674. Similarly, the parole outpatient population increased more than anticipated, rising to 2,685 by June 30, 2001, which was 88 more than projected in the spring. It is now estimated that the parole outpatient population will be 2,567 on June 30, 2002, which is 224 lower than the Spring Projections. The parole outpatient population is expected to be 2,333 by June 30, 2007.

Figures 1 and 2 graphically display the Fall 2001 Projections for the institution and parole and outpatient populations. Figure 1 shows the actual and projected institution population, while Figure 2 shows the actual and projected California Supervised parole and outpatient populations. Both figures are for FY 1991-92 through 2006-07.

Fiscal Years 1991-92 through 2006-07

PREMISES

Figures 3 and 4 on the preceding page display the Fall 2001 Projections for felon admissions. Figure 3 shows the actual and projected felon admissions, while Figure 4 shows the actual and projected felon admissions rates per 100,000 California residents, aged 18-49. Both figures are for FY 1991-92 through FY 2006-07.

C. Felon Admissions

Table C, below, summarizes actual felon admissions to state prison from FY 1991-92 through FY 2000-01, while Table D displays the projected admissions for FY 2001-02 through FY 2006-07. Consistent with past practice, the admission rates displayed in Tables C and D are expressed as the number of felon admissions to prison from court per 100,000 California residents, aged 18-49.

Table C

Actual Total Felon Admissions to Prison
Fiscal Years 1991-92 through 2000-01

Fiscal Year	Number of CDC Felon <u>Admissions*</u>	State Population Aged 18-49 (In Thousands)	Admission Rate**
1991-92	38,037	15,737.4	241.7
1992-93	42,339	15,846.2	267.2
1993-94	42,713	15,850.2	269.5
1994-95	43,707	15,844.2	275.9
1995-96	45,876	15,860.8	289.2
1996-97	46,750	15,930.4	293.5
1997-98	46,512	16,039.1	290.0
1998-99	44,985	16,170.3	278.2
1999-00	41,472	16,303.3	254.4
2000-01	39,346	16,420.3	239.6

^{*} Not including CYA "M" cases, other state/federal admissions, or direct admissions to parole

There has been an absolute decline in admissions for the last four fiscal years. The total admissions for FY 2000-01 were 39,346, down 5.1 percent from FY 1999-00. This continued decline in admissions has contributed significantly to a decline in total institution population.

In the last six months (January–June 2001), total admissions were 19,725. This is 4.5 percent lower than admissions for the same time period one year ago and 133 lower than projected in Spring 2001.

^{**} Number of CDC felon admissions per 100,000 California state residents, aged 18-49

As shown in Table D, there is a significant change in the Fall 2001 felon admissions projection when compared to the Spring 2001 Projections. This difference can be attributed to changes in the overall trend of admissions and, to a lesser extent, changes in the Proposition 36 projection. Projected admissions (Fall 2001, Final) gradually increase over the next six years.

Admissions are projected based on current trends (Fall 2001, Baseline), estimated impact of legislation (Prop 36), seasonality, and projected state population aged 18-49.

Table D

Projected Total Felon Admissions¹

¹ Without Incapacitation Adjustment.

D. Significant Chaptered Legislation and Initiatives

1. Proposition 36

The Fall 2001 Projections includes the projected impact of Proposition 36, The Substance Abuse and Crime Prevention Act of 2000, effective July 1, 2001, which was passed on November 7, 2000. This law provides that persons convicted of a non-violent drug possession offense shall receive probation and conditional drug treatment rather than commitment to prison. In addition, parole may not be suspended or revoked for commission of a non-violent drug possession offense. This will result in lower projected institution and parole populations.

2. Legislation

No legislative bills were chaptered since the Spring 2001 Projections

The following were included in the Spring 2001 Projections:

Statutes of 2001: Chapter 142, (AB 1300, Rod Pacheco & Oller), Chapter 322, (AB 1098, Romero), Chapter 673, (AB 1348, Runner), Chapter 627, (AB 1449, Florez & Margett), Chapter 919, (AB 1789, Zettel), Chapter 689, (AB 1808, Wayne), Chapter 324, (AB 1881, Gallegos), Chapter 669, (AB 2425, Corbett), Chapter 236, (AB 1899, Havice), Chapter 668, (AB 1961, Machado), Chapter 153, (AB 1988, Strickland), Chapter 400, (AB 1989, Dickerson), Chapter 620, (AB 1993, Romero), Chapter 634, (AB 2232, Oller), Chapter 276, (AB 2279, Dutra), Chapter 478, (AB 2523, Rod Pacheco), Chapter 546, (AB 2580, Cox), Chapter 692, (SB 370, Burton), Chapter 561, (SB 580, Lewis), Chapter 657, (SB 1784, Figueroa), Chapter 198, (SB 1802, Chesbro), Chapter 805, (SB 1865, Perata), Chapter 867, (SB 1988, Speier).

A description of the above legislation may be found in the Spring 2001 Projections Publication.

E. The Work Incentive Program (WIP)

This program allows eligible inmates to earn up to a six-month reduction per year in sentence length. The WIP applies to all felons who committed their offenses on or after January 1, 1983 and to those felons who committed their offenses before January 1, 1983 who chose to opt in. Approximately 73 percent of the June 30, 2000 eligible population were earning one-half sentence reduction, and participation is expected to continue at that level throughout the projection period. The Three Strikes Law limits credit earning to 20 percent for affected inmates. The Penal Code also limits persons who have been convicted of any violent felony to no more than 15 percent sentence reduction.

F. Court Sentences

As shown in Table E, on the following page, the mean sentence for felons steadily increased in the first few years after implementation of the Three Strikes Law in March 1994, and stabilized at about 54 months from 1997 through the present. The average work incentive credit steadily decreased since the Three Strikes Law, but has stabilized at about 12 months in the last four years. Anticipated time to serve has stabilized at about 35 months.

Table E

Average Sentence and Credits
For Felon New Admissions and PV-WNTs
(in months)

Fiscal Year	Sentence ¹	Pre-confinement <u>Credits</u>	$\frac{\text{WIP}}{\text{Credits}^2}$	Time to Serve
1992-93	47.9	6.6	17.7	23.6
1993-94	47.5	6.4	17.6	23.5
1994-95	50.9	6.9	15.0	29.0
1995-96	54.0	7.1	12.9	34.0
1996-97	56.0	7.1	12.5	36.4
1997-98	54.3	6.7	12.4	35.2
1998-99	54.6	6.7	12.5	35.4
1999-00	54.4	6.8	12.6	35.0
2000-01	54.6	6.9	12.0	35.7

¹ Includes third-strike and other life commitments

G. Placement Need Projections

As in the Spring 2001 Projections, the Fall 2001 Projections of institution bed needs, by level, consider both inmate classification score level and administrative determinants, such as institutional security and public safety, as specified in Section 62010 of the California Department of Corrections' Operations Manual. It is assumed that the male felon reception center population will fluctuate proportionately with the changes in male felon intake. Special housing projections assume a constant proportion of the number of inmates of each classification level in each of these categories over the projection period.

H. Parole Violators

For the six-month period January–June 2001, there were 34,763 male felon parole violators (PV-RTCs and PendRevs) returned to custody, 1,445 more than projected in Spring 2001. The corresponding return rate was 56.8, 2.9 higher than projected. The Fall 2001 Projections assume the PV-RTCs and PendRev rate will be higher than projected in the Spring 2001 Projections.

There were 7,166 male felon parole violators returned with new terms (PV-WNTs) for the January–June 2001 period, 170 less than projected in Spring 2001. The corresponding male felon PV-WNT rate was 11.7, only 0.2 lower than projected in Spring 2001. The Fall 2001 Projections assume the PV-WNT rate will be about the same as projected in the Spring 2001 Projections.

² Work Incentive Program credits based on eligibility

The graphs on the following pages illustrate actual and projected parole return numbers and rates. Figure 1 displays the actual number of male felon parole violator returns by quarter since June 1991. Figure 2 shows the male felon PV-RTC/PendRev rates by quarter from June 1991 to June 2007, while Figure 3 tracks the male felon PV-WNT rates.

I. Felon Parole Population

On June 30, 2001, the felon parole population was 115,628, which is 2,552 lower than projected in Spring 2001. Between January and June 2001, this population decreased by 1,749.

For the six-month period January to June 2001, there were 15,860 male felon parolees suspended to parolee-at-large (PAL) status, 1,113 more than projected in Spring 2001. The corresponding PAL rate was 30.4, 2.4 higher than projected. The Fall 2001 Projections assume that the male felon PAL rate will be slightly higher than projected in the Spring 2001 Projections.

There were 15,907 male felon parolees discharged from parole over the last six months. This was 1,372 more than projected in Spring 2001. The corresponding discharge rate was 26.1, 2.5 higher than projected. The Fall 2001 Projections assume that the male felon discharge rate will be slightly higher than projected in the Spring 2001 Projections.

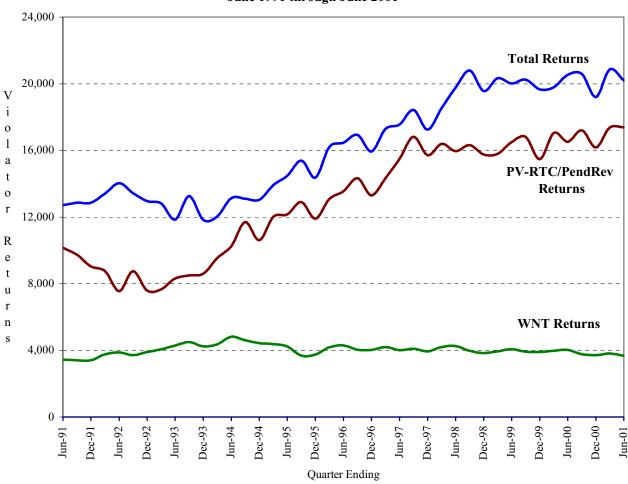

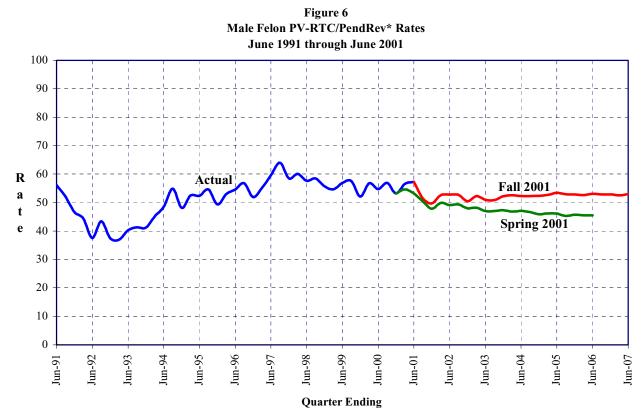

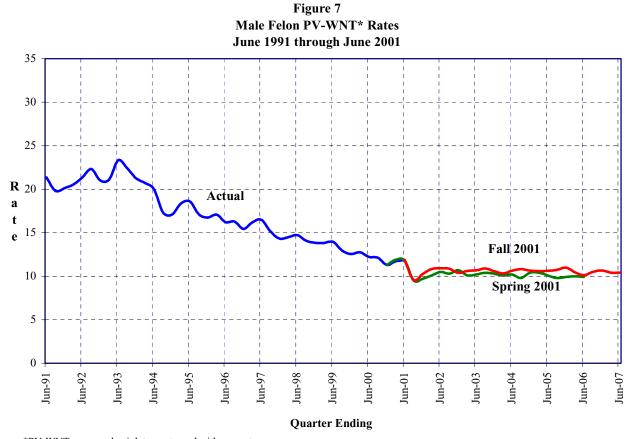

Figure 5
Male Felon Parole Violator Returns
June 1991 through June 2001

^{*}PV-RTC/PendRevs are parole violators returned to custody or pending revocation.

^{*}PV-WNTs are parole violators returned with a new term.

III. FALL 2001 POPULATION PROJECTIONS

The Fall 2001 Projections are summarized in Tables 1 and 2, and are presented in greater detail in Tables 3 through 16. Tables 3 and 4 present the quarterly institution populations, while Tables 5 and 6 present detailed projections by inmate placement needs. Tables 7 through 10 project the movement of institution populations (including civil narcotic addicts), and Tables 11 through 16 present detailed projections of the parole and outpatient population.
